Innovation in Shower Systems

Years of Kiwi design and development have gone into creating the innovative range of patented Aquapole Stainless Steel Shower Systems – both indoor & outdoor.

A key feature is the stainless steel shower slide, hand piece, mixer and plumbing are all integrated into a single unit, so the usual in-wall plumbing is no longer required.

Indoor

Aquapole creates stylish, minimalist, easy to clean open spaces, where the pole can be positioned at the entry of the recess and water flow directed against the wall; providing the convenience of adjusting water temperature without getting wet.

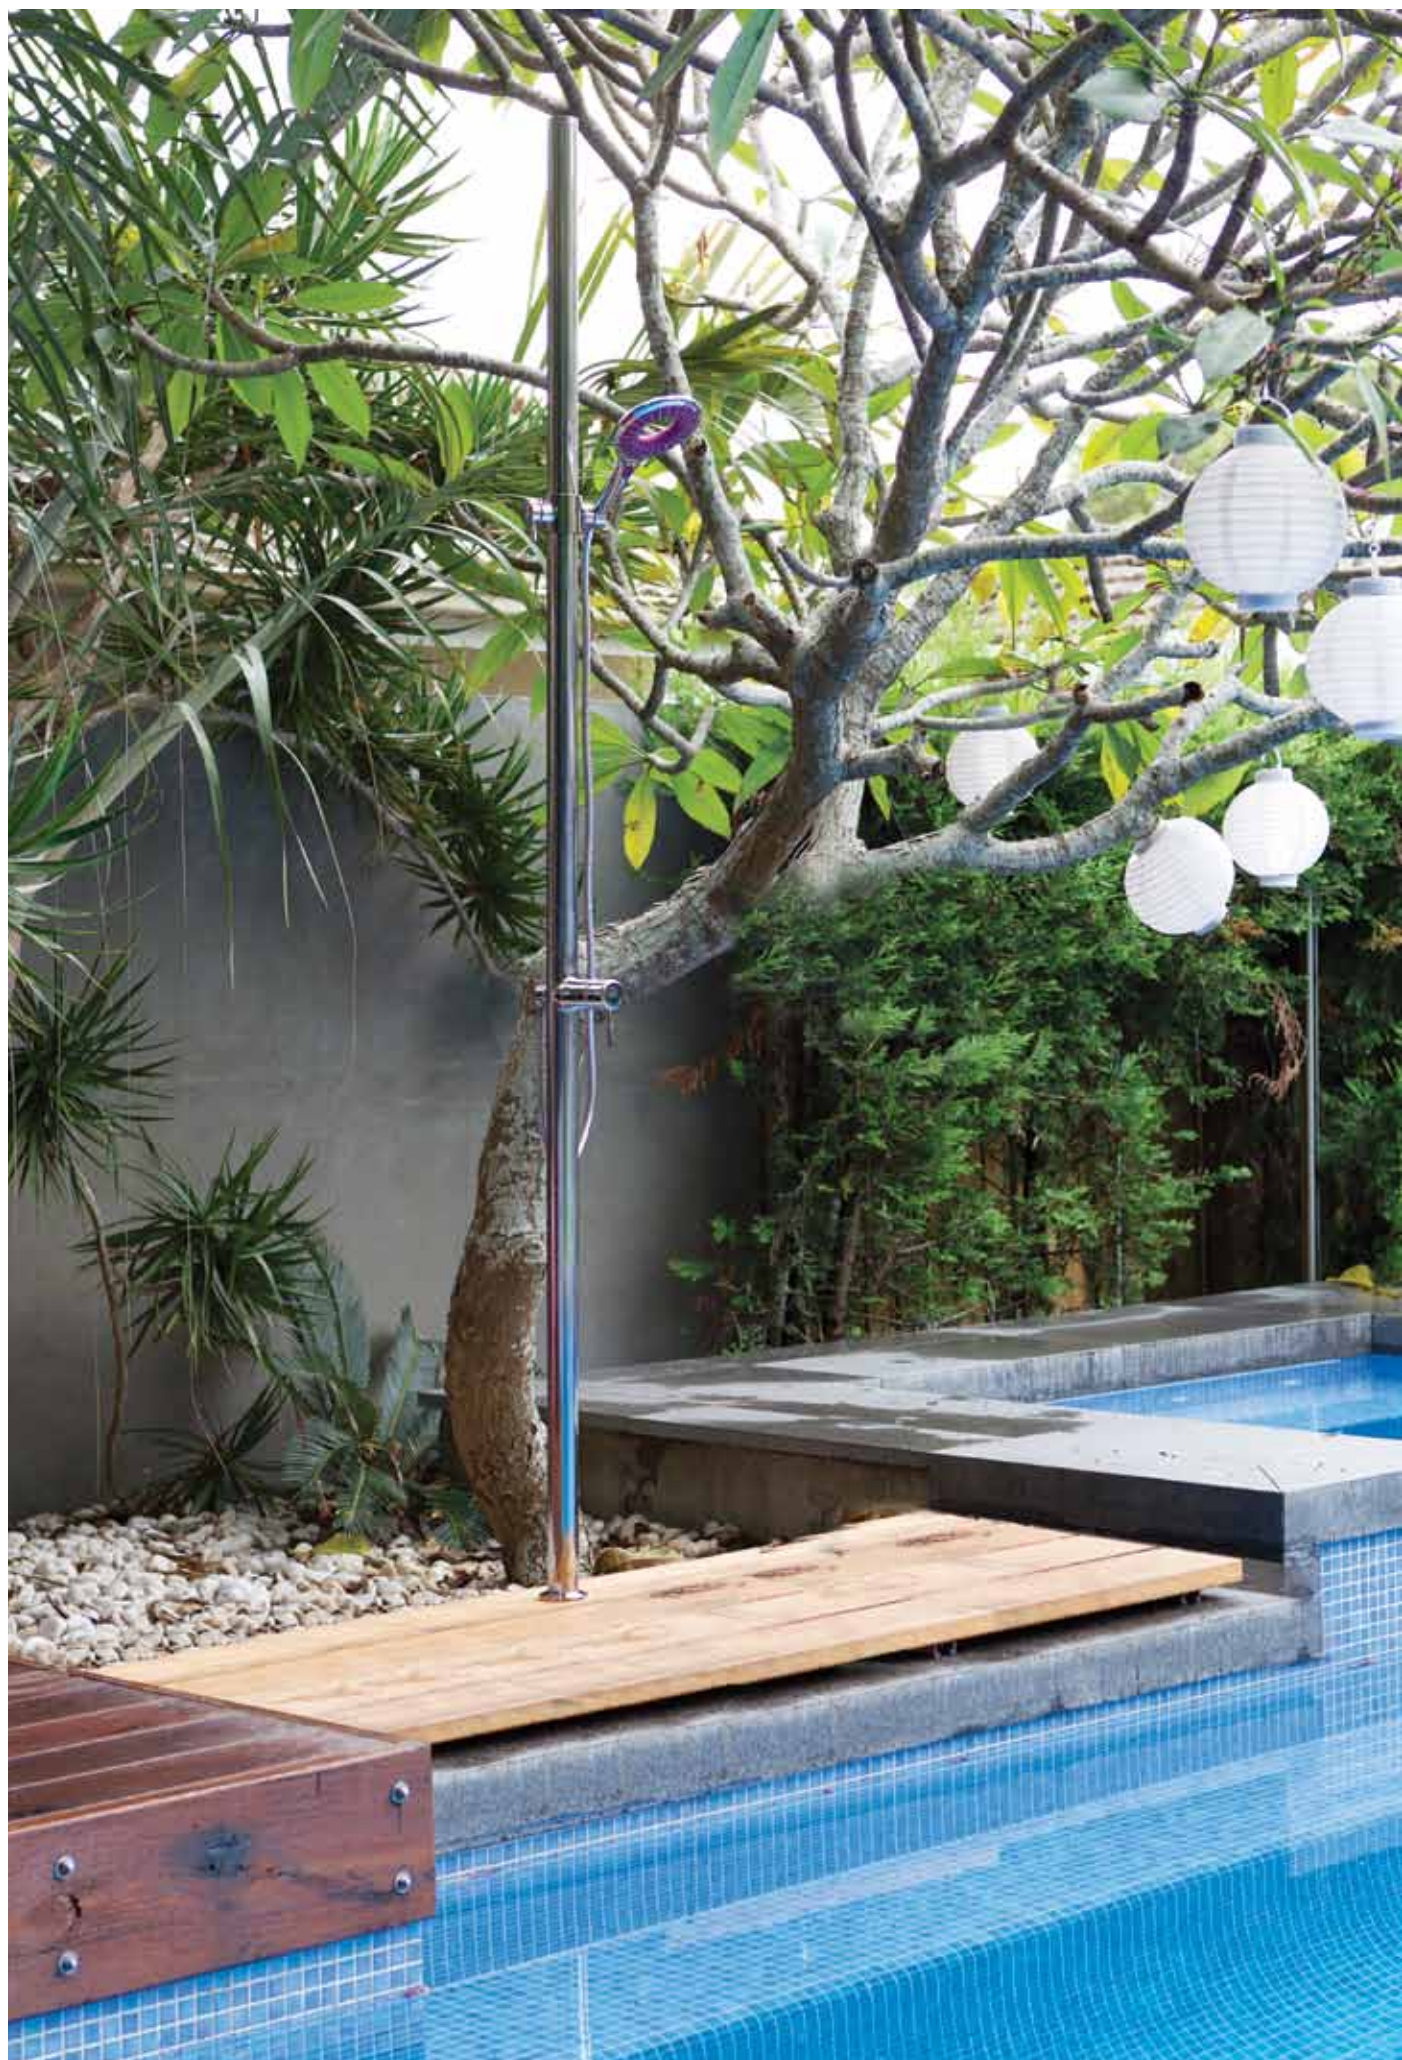

Unleash your creativity with bathroom design, where wet area walls feature photo images or artwork uninterrupted by wall mounted tapware & shower heads.

Plumbed from ceiling or floor there is no risk of in-wall leaks and pipe noise; and will not compromise soundproof or fire walls. Requiring minimal space & offering flexible positioning, it is a clever design choice for bathrooms of all shapes and sizes.

Outdoor

Being 316 marine grade stainless steel, the Aquapole is a perfect choice for an outdoor or poolside shower. Unlike traditional outdoor showers the Aquapole is both stylish & practical, providing flexible height adjustment and catering to the whole family.

Specifications

NZ designed and manufactured - 5 year product guarantee. (excludes rose and hose) New Zealand Made.

There are 3 models distributed:

1. Outdoor
2. Indoor – floor to ceiling
3. Indoor – glass mount/wall mount

- Water temperature maximum 65°
- Water pressure maximum 500 kpa
- 35mm ceramic cartridge
- Suitable for ceiling height 2.4m to 3m

Valve

Our NZ made valve is designed specifically for the Aquapole Stainless Steel Shower System & to comply with the future requirements of AS/NZS3718.

- Model No. KSV2

Hose/Shower Head

- Quality metal sheathed 1.5m long
- Strong & flexible
- Tri Jet 3 function
- Foreno Model No. FSL3

Stainless Steel Slider

- Unique construction to withstand years of constant use.
- Crafted from stainless steel.
- Adjustable slider caters to all heights for a pleasurable shower.

Glass Mount

- The Glass Mount opens endless options for design, with all the benefits of the Aquapole.
